Intelligent security; intelligent data
intelligent management solutions
Intelligent IP Security for a Connected World

iFacility

Security, surveillance, safety... all from one expert provider

At iFacility, we offer you a genuinely complete, fully-managed and totally integrated service: from designing the system, sourcing, installing and commissioning right through to providing technical support, on-going system management and all the backup services you need.

And because we utilise the latest IP based technologies, your security system could be a powerful management tool too: delivering surprising opportunities for business monitoring, data analysis and operational efficiency gains.

You get one flexible, scalable, futureproof solution, delivered by one specialist partner, with one point of contact, no matter how many sites you have and wherever they are in the UK or further afield.
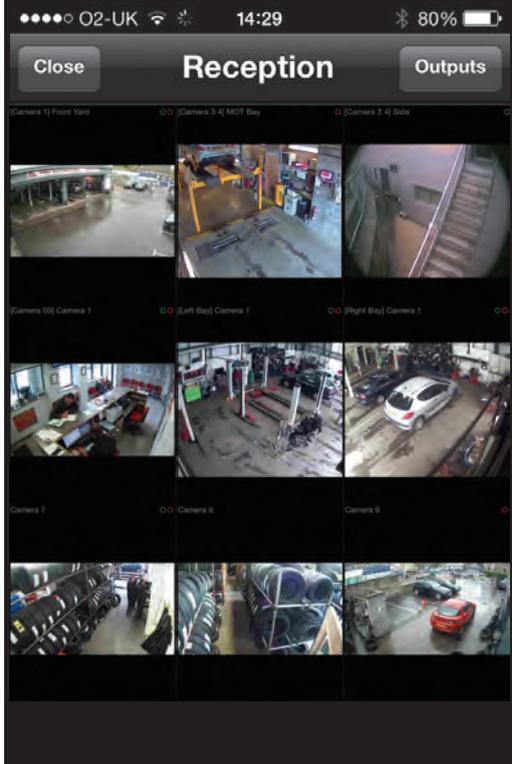

We manage everything for you, leaving you free to get on with running your business because we believe it's our job to make yours easier.

Unique, unlimited, unrivalled access

Our unique MyFacility lets you access and monitor your security system from mobile devices and the web wherever you have a broadband or mobile connectivity. And it's available 24/7/365.

Instant, direct access gives you the ability to view your CCTV images in real time, check archived footage even control your entry/exit points and make sure you know exactly who's on site. It's total management and visibility with everything at your fingertips, simply, quickly and immediately - no matter where you are.

With our systems, your plans become possible...

iFacility have solutions no matter what the size of your business. Whether you have one site or many, operate locally, nationally or globally, here are some of the things we can do for you:

IP HD CCTV delivers ultra-clear, high definition, megapixel images and a host of other benefits too

Intelligent CCTV Analytics makes it possible to use your CCTV system to deliver data on customer behaviour, store hotspots and much more

Fire & Intruder Alarms providing vital protection against theft, vandalism and fire

Proactive CCTV & Remote Alarm Monitoring protects your people, assets and infrastructure, 24/7/365

Access & ANPR Control monitors and manages entry and exit at all your doors, gates and barriers

Security Lighting & Electrical combine the latest highly efficient LED lighting with your solution to ensure high quality images 24/7/365

With MyFacility remote and mobile access, professional project consultancy, specialist technical maintenance and market-leading expert support from our experienced team, we're on hand to help, 24/7

With our guidance, you can choose exactly what you need. A stand-alone system, or integrated. We can even incorporate your existing analogue equipment to help manage costs and our scaleable IP technology can grow with your company.
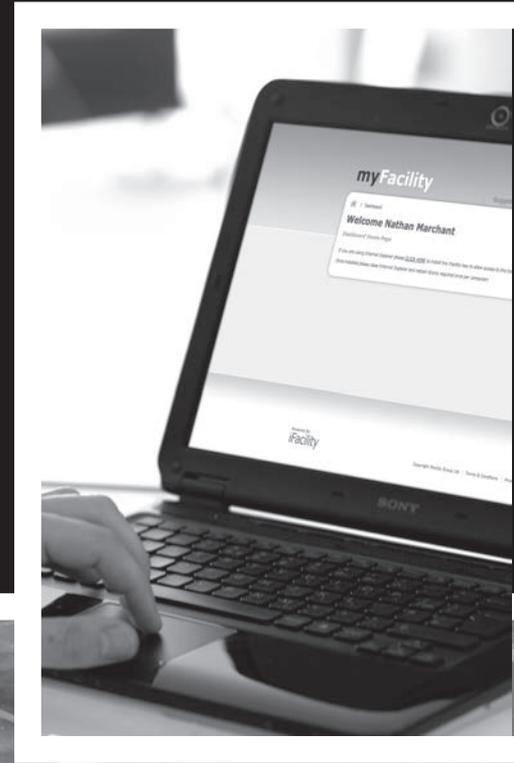

How much more could your security system do for you?

Obviously your system should deliver all the security, surveillance and control you need, but with our state-of-the-art IP based technologies, it can do so much more to help you with business monitoring and performance improvements too.

From data on foot fall to help you with planning; perhaps video capture of barcode images to improve inventory movements; even shopper profiling, queue and abandonment statistics and staffing details for retail analytics on a store by store or region by region basis… our solutions can push the boundaries for you, delivering surprising opportunities for data analysis and operational efficiency gains.

When designing a system we will always ask: "What else can this do for you?" with the aim of maximising your investment by delivering intelligent, integrated solutions which give you the potential to do more than you ever imagined.

Putting your company's interests first

Our engineers are committed to devising the best solution for your particular needs. We are not limited to using a particular supplier nor manufacturer and so our engineers can use their knowledge and experience to bring together all the right elements that will deliver the best system for you.

Your security, safe in our hands

Whatever your business, ours is to keep your staff, your assets and your infrastructure safe and secure; with the added bonus of improving your operational data, increasing your control and delivering potential efficiency gains too.

We are proud to have extensive experience in:

- Small Business
- Enterprise
- Retail
- Transportation
- Offices
- Food Production
- Manufacturing

- Hotel & Leisure
- Finacial
- Services Industry
- Defence
- Global Projects
- Utilities
- Argicultural & Equestrian

We work nationally and internationally across all these sectors. Our technologies and solutions are proven to be scalable flexible and futureproof making it easier and more cost effective to take advantage of new products and services as your company evolves.

With iFacility, your security system could do more for you than you ever imagined!
